COVID-19 response

To support ongoing academic research and industrial work, the nanoFAB continues to remain open.

However, to combat transmission of COVID-19, the nanoFAB has instituted additional policies: all users must review these policies and follow them when using the nanoFAB.

Additional measures may need to be put in place as the situation evolves—we appreciate your patience as we navigate this unprecedented scenario.

Welcome to the University of Alberta nanoFAB knowledge base

This site is intended for both nanoFAB staff & users and contains information specific to working in the centre. All users should familiarize themselves with the Emergency Preparation section, creating an LMACS request, and the general Policies and Procedures sections. For specific administrative tasks, you can visit the how-to sections. The site also contains a listing of Application & Process Information, SDS sheets, and Standard Operating Procedures.

1. Register for access
2. Read the policies & procedures
3. Discover how-to articles

Emergency Preparation
