

CYTOP CT-SOLV180

Product	CYTOP CT-SOLV180
Manufacturer	AGC Inc.
Composition	90–95% perfluorotributylamine , 5-10% unidentified impurities; liquid
Synonyms	perfluorotributylamine, perfluorotrialkylamine
Typical Uses	Solvent for CTXSP2 polymer .
Hazards	200 Not classified as hazardous.
Storage	Cabinet 5 (organic solvents)
Disposal	Liquid: Collect waste in dedicated "Halogenated waste" bottle, to be stored in Cabinet 5 until full. Solid: Organic waste / organic sharps waste containers in primary or secondary litho areas.
Comments	Use in litho wetdecks, Aisle 1 General Use wetdecks, or Aisle 1 fumehood for dilution of CTXSP2 polymer . ⚠ Do not heat 300 °C: product may decompose and evolve carbonyl fluoride , hydrogen fluoride (HF) , and perfluoroisobutylene .
Status
