

Novec Engineered Fluid 7200DL

Product	Novec Engineered Fluid 7200DL
Manufacturer	3M Canada Company
Composition	55–90% ethyl nonafluoroisobutyl ether , 10–45% ethyl nonafluorobutyl ether ; liquid
Synonyms	
Typical Uses	Alternative solvent for CTXSP2 polymer , used for stripping and lift-off.
Hazards	<p>301</p>  <p>Physical hazards not otherwise classified CATEGORY 1 (In use, may form flammable/explosive vapour-air mixture.)</p>
Storage	Cabinet 5 (organic solvents)
Disposal	Liquid: Collect waste in dedicated "Halogenated waste" bottle, to be stored in Cabinet 5 until full. Solid: Organic waste / organic sharps waste containers in primary or secondary litho areas.
Comments	Use in litho wetdecks or Aisle 1 General Use wetdecks for lift-off/stripping processing. ⚠️ Avoid extreme heat: combustion / thermal decomposition products include hydrogen fluoride (HF), and perfluoroisobutylene (PFIB).
Status
