## Staff Directory

### The nanoFAB Team

The nanoFAB staff are here to act as resources to assist you in your project needs while working in the facility. Our dedicated team leverages years of research & industry experience to help find creative solutions to your most demanding problems.

In order for our staff to operate efficiently and effectively, please take the time to be prepared when meeting with staff members so that the value of your time together can be maximized. You can often save a lot of time by searching through our website for answers to the most common problems.

In most cases, formal requests should be submitted through LMACS to ensure they are routed to the appropriate staff member and tracked accordingly.
