

CYTOP CTXSP2

Product	CYTOP CTX-8**SP2 (** = 01 ~ 15)
Manufacturer	AGC Inc.
Composition	85–99% Perfluorotributylamine , 1-15% Poly-1,1,2,4,4,5,5,6,7,7-decafluoro-3-oxa-1,6-heptadiene ; liquid
Synonyms	Perfluorinated solvent
Typical Uses	Lift-off layer for organic depositions; replacement for Orthogonal SL2.
Hazards	1 1 1 Not classified as hazardous.
Storage	Cabinet 11 (photoresists) or Cabinet 14 (flammables fridge)
Disposal	Liquid: Collect waste in dedicated "Halogenated waste" bottle, to be stored in Cabinet 5 until full. Solid: Organic waste / organic sharps waste containers in primary or secondary litho areas.
Comments	To be spin-coated using Headway or Laurell spinners and baked in Aisle 1 Fumehood. May be diluted with CYTOP CT-SOLV180 . ⚠ Do not heat 300 °C: product may decompose and evolve carbonyl fluoride , hydrogen fluoride (HF), and perfluoroisobutylene .
Status
